Lecturer

The Huber Marionettes

This entertaining lecture was created to give the public a better understanding of puppetry. During this presentation, Phillip shows all aspects of his creative process. The opening video delivers a montage sampling of his unique characters. This is followed by a short performance of three vignettes. Next is a segment entitled "Making of a Star" which covers the design, construction, costuming, and rehearsal process, leading to the development of his portrait puppet "Nicole" (inspired by Natalie Cole). All this is narrated live by Phillip Huber. Questions and answers are welcomed during Phillip closing presentation, a revealing "Tricks of the Trade", in which he'll breakdown the complexity of the acts in a live demonstration using several marionettes. A short picture-taking session is always available at the close of the lecture. The running time for this presentation is approximately 1-2 hours.

Guest Lecturer for:

Disney Featured Animation - Burbank ,Ca
Disney Featured Animation Orlando, FL
Detroit Institute of Art
California Institute of Art
University of San Diego
Eugene O'Neill Theater Center
